Office Action Summary

Art Unit 1762

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-12, drawn to a method of infrared irradiation to deposit electrocatalytic or protective coatings from a precursor on an electrode (substrate), classified in Class 427, subclass 553+ (557).

II. Claims 13-14, drawn to a conductive electrode on a substrate with an electrocatalytic or protective coating, classified in Class 428, subclass 411.1+.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by materially different processes, such as thermally curing a protective coating may produce the same physical protective coating as an IR cured coating, which may also cure by heat but from a different source.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as

Art Unit 1762

shown by their different classifications, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. A telephone call was made to David Serbin on 3/17/03 to request an oral election to the above restriction requirement, but did not result in an election being made. Mailing was requested, due to the need to consult the inventors.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
